***RAJAROICON 2027*** aims to foster thoughtful dialogue on practical approaches that are precise yet accessible, innovative yet implementable, and technologically advanced yet firmly grounded in patient needs .***"Pragmatic Solutions in Radiation Oncology"*** reflects our commitment to bridging the gap and bringing together evidence, expertise, technology, and real-world clinical experience to address the challenges encountered in contemporary cancer care.The focus is not simply on what is possible, but on what is meaningful, feasible, and impactful for our patients.
